How to use the Grip All-in-1 Wireless Charging Phone Mount?

STEP 1: Attach desired mounting adapter to phone holster and tighten the knob to fully secure.

Insert ball of mount into hole on the back of the phone holster and tighten.

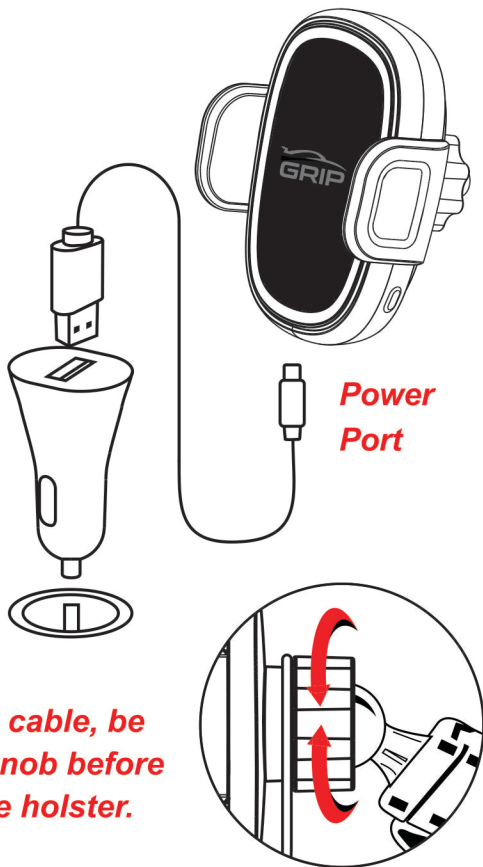

To learn about the adapters and how to mount them in your car, please see other side for more details.

STEP 2: Plug the car charger into the cigarette lighter socket to power on.

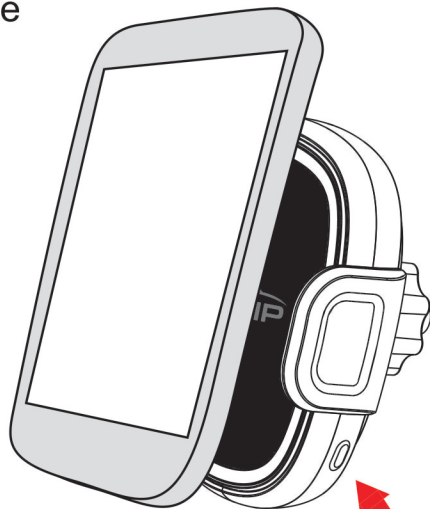

Connect the USB cable to the charger.

Loosen the back screw slightly before inserting USB cord through the support arm and into the Wireless Charging power port.

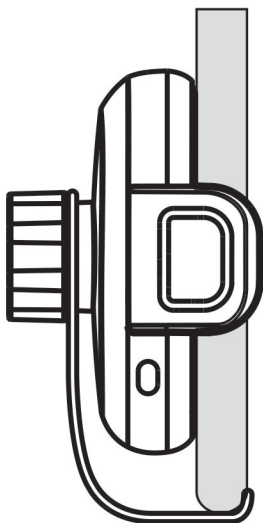

After connecting the USB cable, be sure to tighten the back knob before placing your phone on the holster.

STEP 3: Place your phone on the holster with the bottom of your phone resting on the support base, and the arms will automatically close and hold your phone in place.

*Place
Phone*

*Support
Arm*

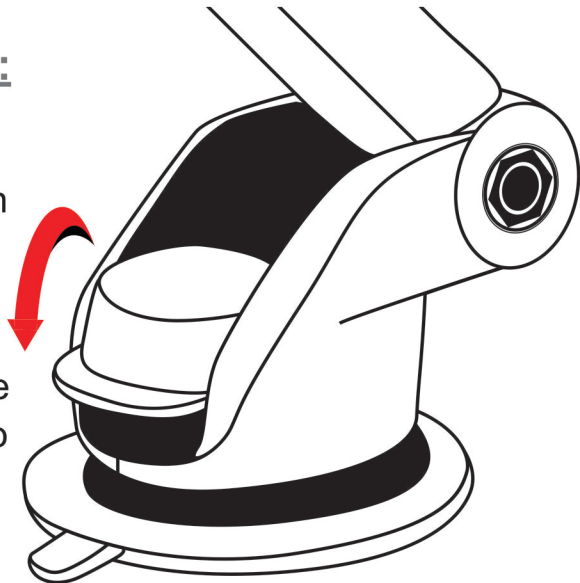

To remove your phone, touch the button on either side of the mount and the arms will open automatically.

Suction Mount:

1) LOCK:

Slide the tab down to secure suction to surface.

2) UNLOCK: Slide the tab upwards to release suction.

remove clear film beneath suction before use.

Suction Grip surface pad

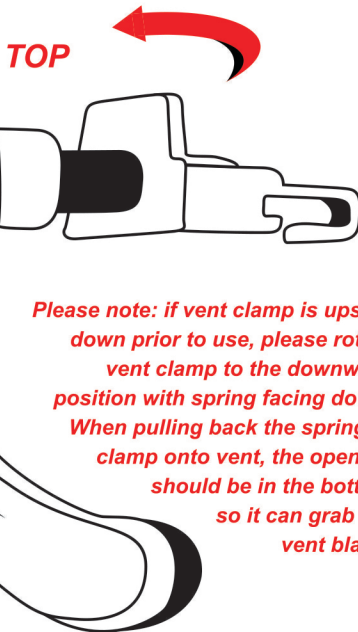

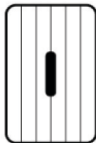

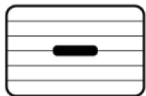

NOTE: Place grip pad under the suction for some surfaces.

Vent Clip Mount:

Pull clip spring back and slide hook into vent to secure position.

when holster and phone are attached, vent clip will sit secure during movement.

works with most car vents:

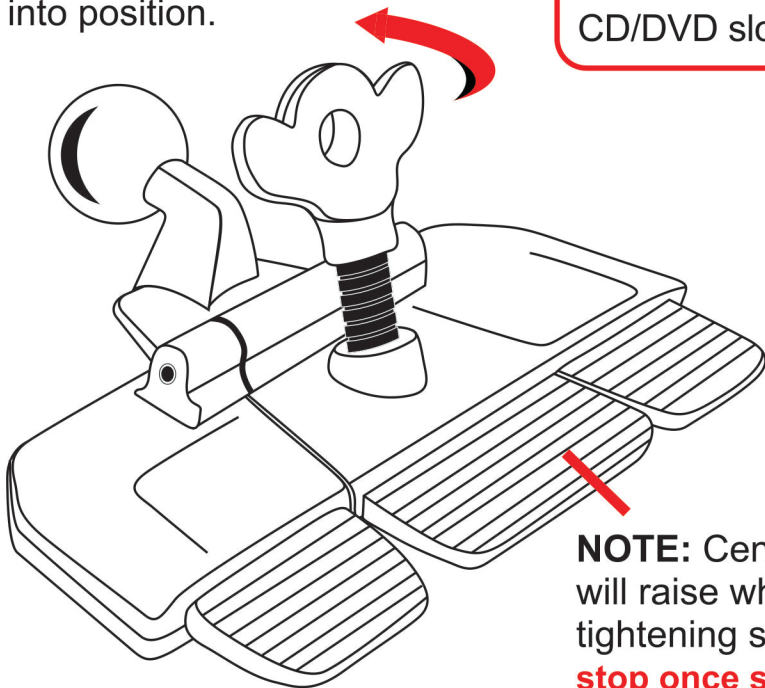

Please note: if vent clamp is upside down prior to use, please rotate vent clamp to the downward position with spring facing down. When pulling back the spring to clamp onto vent, the opening should be in the bottom so it can grab the vent blade.

NOTE: Does not work with some circular vents.

CD/DVD Slot Mount:

Insert mount into CD slot and tighten screw to lock into position.

NOTE: Does not work with some CD/DVD slots.

NOTE: Center tab will raise while tightening screw,
stop once secure.

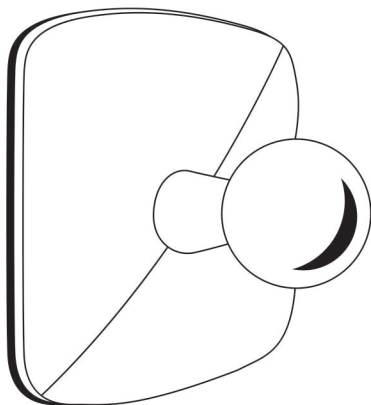

Adhesive Stick-On Mount:

1) Clean surface of where you want to mount before installing and wipe dry.

2) Place mounting bracket on flat surface and press down to secure.

***remove sticker film
beneath mount
before use.***

***Great for Cars, RVs,
Boats, Desktops and
many more surfaces.***
